Technical Skills: JavaScript, SQL, Tableau, Node.js, Express, React, HTML5, CSS, MongoDB, APIs, Version Control Projects

Autoban (React, Sequelize, Express, Socket.io)

- Developed a project management web application which allows users to create teams and kanban boards for their projects with real-time updates

PubIO (React Native, Firebase)

- Built mobile application for users to subscribe to bar crawl deals and receive a barcode to redeem drink specials

Employee Directory (React, Express, Jest, CircleCI)

- Created an employee table and tested the API call by mocking axios

Experience

Quality Systems Project Manager

June 2019- Present

Facebook

Austin, TX

- Reviewed engineering system design proposals to ensure operational use cases are covered and communicated optimal system performance to sites to enable them to flag errors
- Led projects to build tools that improve the quality of our measurement systems by creating timelines, allocating resources, and communicating progress to management
- Managed phased global launches and provided detailed reports on software bugs and deficiencies to be resolved prior to the final global roll-out

Demand Planner

June 2018- May 2019

Chewy.com

Dania Beach, FL

- Generated weekly business recaps for stakeholders based on week over week trends and future expectations which included recommendations for marketing spend and price changes
- Produced Tableau dashboards to track reasons for out of stock items and to conduct extensive seasonality analysis resulting in a 5% improvement in category accuracy
- Created SQL queries to automate processes such as adjusting demand history and analyzing item attribute performance saving 2-3 hours per week per demand planner

Management Training Program

June 2017 - June 2018

Chewy.com

Dania Beach, FL

Merchandising Intelligence Analyst (January 2018- June 2018)

- Conducted margin analysis on new brands using Excel macros to determine profitability which aided in contract negotiation around payment terms, minimum order quantities, and market price
- Completed ad-hoc SQL and Tableau projects such as marketing performance and item sourcing reports used to plan marketing efforts and reduce shipping costs
- Acted as a liaison between cross-functional teams to root cause and solve EDI, fulfillment center, and customer-facing issues

Outbound Operations Supervisor (July 2017- January 2018)

Mechanicsburg, PA

- Monitored daily outbound operations on an hourly and quarterly basis to determine shift productivity
- Planned reslotting project by calculating labor hours needed and dividing it across multiple shifts to minimize impact on shift performance; increased picks per aisle by 36%

Automated Logistical Specialist, Sergeant

April 2014 - April 2020

Florida Army National Guard

Fort Lauderdale, FL

- Plan, execute, and supervise transportation projects to include risk analysis and asset management
- Coordinate dispatches and communicate with the State Logistical Resource Center about completed projects and on-hand inventory during hurricane activation
